I. Introduction

History

Alaska’s original state plan for industrial safety and health was submitted to the U.S. Secretary of Labor for approval on December 8, 1972. The Alaska Legislature enacted legislation in 1973 to bring the safety division, statutes, and regulations into conformity with the OSHA Act of 1970. The Alaska Occupational Safety and Health Statutes, AS 18.60.010 – 105, became effective on July 24, 1973. Alaska completed the development steps required under Section 18(b) of the Act on or before October 1, 1976 and received 18(e) certification on September 14, 1977. The State Plan received 18(e) final approval by the U.S. Department of Labor September 26, 1984.

This combined Report (FFY14) outlines our progress towards accomplishing the goals of the FY14 Annual Performance Plan agreed to by AKOSH and OSHA and its impact on the progress toward accomplishing the goals set down in the Five-Year Strategic Plan as well as a summary of the results of the FY14 – FY18 Strategic Plan. These plans are intended to be comprehensive in scope, replacing the federal/AKOSH comparison method formally used by OSHA to measure our effectiveness.

AKOSH will develop an annual performance plan with Federal OSHA for each year of the Five-Year Strategic Plan. The performance measures outlined in these plans are results-oriented. However, statistical analysis of the identified specific performance measures will also be used to determine if the activities included in the plans had a positive impact on the performance goal of reducing the number of injuries and illnesses in the workplace.

Mission

The primary mission of the AKOSH program is to work in partnership with Alaskan workers and employers toward eliminating workplace injuries, illnesses, and workplace fatalities. However, the location, geography, and demography of the state results in work sites and practices that are unique to Alaska. As a result, the State of Alaska administers its own occupational safety and health program because we are more able to respond quickly to the unique needs and circumstances of our state.

Organization

The Alaska Occupational Safety and Health Program is located in the Alaska Department of Labor and Workforce Development, Division of Labor Standards and Safety. Commissioner, Dianne Blumer, heads the Department. Acting Director, Al Nagel, heads the Labor Standards and Safety Division. Chief of Enforcement, Keith Bailey, manages and supervises the enforcement program with assistance from the OSH Analyst (Assistant Chief). The enforcement program has five industrial hygienist positions and six safety office positions. Chief of Consultation, Krystyna Markiewicz, manages and supervises the consultation and training program. The consultation program has three industrial hygienist positions, eight safety consultant positions, one seafood safety coordinator, and one youth safety trainer position.

<td>None (See comments below)</td>
</tr>
</tbody>
</table>

Comments: The fatality rate in Alaska for fatalities caused by circumstances under the control of AKOSH is very low, the plan does not require percentage decreases year-by-year. Therefore, the goal is a 10% reduction in the rate per 100,000 employees over the entire five-year period as compared to the number of fatalities per 100,000 employees from the most recent five-year period for which data is available (FY09–FY13). The fatality rate will be calculated at the end of each annual reporting period along with the total number of fatalities to provide an indicator of progress toward the goal.

#### Fatality Inspections:

- 2nd quarter: #316899210 – State of Alaska / DOT (SIC 1611)
  - #316899426 – Southeast Alaska Backcountry Adventures* (SIC 0799)
- 3rd quarter: #316900398 – Columbia Helicopters Inc (SIC 0851)
- 4th quarter: #316901222 - Crown Alaska Inc

#### Note:

- Event #101683647 – Egegik Seafood Processing Facility – originally it was a failure to report to the State. AKOSH did the opening; fatality cause is employee suicide. Employer had no obligation to report this fatality; therefore, it is not included in the total number of fatalities for FY14.

- Event #101683712 – Lynden Transport, Inc. – originally it was a failure to report to the State. AKOSH did the opening; fatality cause is vehicle roll over. This fatality investigation falls out of AKOSH jurisdiction, and, thus, it is not included in the total number of fatalities for FY14.

#### Comment:

* - Southeast Alaska Backcountry Adventures - Case is settled and citations are of final order. As a result of this fatality, stake holders in the industry has become involved in seminars, training, workshops, and equipment that is vital in safety procedures for this industry. This is instrumental of AKOSH to move forward with creating a Local Emphasis Program (LEP) for all exposed to Avalanche hazards.

**Strategic Plan Period (FY14-18) Running Total # of Fatalities = 4**

**Strategic Plan Period (FY14-18) Target Rate = 1.53 / 100,000 Employees**

Outcome Goal 1.2: Reduce the number of worker injuries and illnesses in the construction industry by focusing compliance, consultation, and outreach efforts on the causes of “struck by” and “falling” incidents;

Annual Performance Goal 1.2: Reduce the lost time injury and illness rate in the construction industry as determined by the number of lost time injuries and illnesses per hundred employees by 2%;

Performance Strategies:

- **Enforcement/Compliance Assistance**: Conduct scheduled inspections in the construction industry paying particular attention to worksites where “struck by” and “falling” incidents are most likely to happen;

- **Consultation**: Conduct seminars, workshops, and special programs, conduct on-site consultation visits, target training and consultations towards those activities most likely to experience “struck by” or “falling” incidents;

Indicators:

- **Enforcement/Compliance Assistance**: Number of inspections completed in construction industry

- **Consultation**: Number of seminars, workshops, on-site consultations, and special programs completed in construction industry

FY14 Annual Goal Target = 1.50 /100 employees

FY14 Actual Outcome = 1.58

Comments: AKOSH is 0.08% away from reaching the target goal due to an increase of oil&gas related construction projects in the state.
Outcome Goal 1.3

Reduce the number of worker injuries and illnesses in the transportation and warehousing industry sector (NAICS* code 48xxxx – 49xxxx) by focusing compliance, consultation and promotional efforts on the causes of “struck by”, “falling”, and “caught in or between” incidents;

Annual Performance Goal 1.3

Reduce the rate of lost time injuries and illnesses in the transportation and warehousing industry sector by 2%;

Strategies:

**Enforcement/Compliance**

Conduct scheduled inspections in the transportation and warehousing industry worksites where “struck by”, “falling” and “caught in or between” incidents are most likely;

Outcome Goal 1.5

Respond effectively to legal mandates, so Alaskan workers are provided protection under the AKOSH Act.

Annual Performance Goal 1.5.a

Initiate inspections of fatalities and catastrophes (three or more hospitalizations**) within one (1) working day* and for two or less hospitalizations** within seven (7) working days for 90% of occurrences to prevent further injuries or deaths.

Strategies:

**Enforcement** - Initiate inspections of fatalities and incidents where three or more workers are hospitalized within one (1) working day and where one or two workers are hospitalized within seven (7) working days.

Indicators:

**Enforcement** - Percentage of cases that meet the requirements

Data Source(s): IMIS/NCR

Baseline: None

Goal: 90% within time limits

Comments: The threshold of three or more hospitalizations meets the federal standard for a catastrophe and the threshold of one to two hospitalizations** meets state requirements.

*Note: Investigations delayed due to limitations that exist in Alaska such as weather, lack of roads, and travel restrictions, will not be counted against the percentage.

**Note: Hospitalization equates to an in-patient overnight stay of at least one night.

*(Working days) – or meets requirement for delay.

Outliers:

In the 4th quarter: complaint #206018137 inspection #316901131 Country Food Grocery - this event was not inspected in a timely manner due to accidental oversight.

Comments: Due to data entry error by AKOSH, Federal OSHA report shows complaint #206017485 inspection # 316898832 Northstar Center as an outlier for phone-fax complaint investigations in the 1st quarter and complaint #206018277 inspection # 316901628 Fairbanks Refinishing and Upholstery as an outlier in the 4th quarter for on-site complaint inspections. AKOSH has fixed the errors to reflect corrected dates.
Outcome Goal 1.5
Respond effectively to legal mandates, so Alaskan workers are provided protection under the AKOSH Act;

Annual Performance Goal 1.5.c
Resolve 75% of all discrimination cases within 90 days;

Strategies:
Discrimination - Resolve 75% of all discrimination cases within 90 days;

Indicators:
Discrimination - Percentage of cases that meet the requirements;

Data Source(s): IMIS/NCR and report from 11c officer

Baseline: 75% within time limits

Comments: Per 29 CFR 1977.16 extensions to the 90-day requirement can be made in rare cases. However, any case extended past the 90-day limit will not be exempted from the 75% requirement.

VII. Significant Activities/Achievements

Alaska Occupational Safety and Health:

At the end of the 2nd quarter, AKOSH had initiated preparatory work for a public meeting with stakeholders in Alaskan heli-skiing operations. The Department of Labor was seeking stakeholders input on the existing industry operating procedures and potential need for stricter regulations in Alaska. The public meeting held on May 21st, 2014, with a teleconferencing capability. Currently AKOSH is reviewing the received comments.

Furthermore, AKOSH enforcement has begun drafting an Alaskan local emphasis program (LEP) targeting heli-skiing industry. The announcement of Alaskan heli-skiing LEP was made during the teleconference on May 21st.

Enforcement:

In the 2nd quarter, Enforcement had established High Hazard Targeting (HHT) list collecting Workers’ Compensation data for 2013 calendar year. The letters were sent out to all employers on this list informing them of the options to correct their situation with present number of time loss injuries/illnesses in their working environment.

Additionally, Enforcement had mailed out the letters to the employers in the communication tower industry operating in Alaska to remind them of the responsibility to recognize and prevent workplace hazards and use State of Alaska resources such as AKOSH Consultation and Training.

AK OSH Significant Cases – fatalities and/or significant injuries:

1. Accident investigation (316899061) - On January 18, 2014 an employee of Haskell Corporation suffered fractures to ribs and sternum while activation of the movement controls by an operator and causing the aerial lift to have forward movement that resulted in the employee being pinned between the aerial lift basket and a closed overhead door.

2. Accident investigation (316899145) - On January 26, 2014 Carlile Transportation Systems’ employee suffered leg and head injuries when unstable load pinned him to the ground. The wheeled loader operator quickly lifted the load upright and off the victim preventing life threatening injuries.
